Portfolio

CAREER OBJECTIVE

BSIT student who ships tested, secure full-stack and Android apps, seeking an internship in software, AI, or cloud.

EDUCATION

Bachelor of Science in Information Technology (BSIT), 4th Year
Cebu Institute of Technology – University (CIT-U), Cebu City | Expected Graduation: 2027
Coursework: Data Structures & Algorithms, Software Engineering, Systems Analysis & Design, DBMS, Web & Mobile Development

TECHNICAL PROJECTS

PlayIT — Offline English Phonics App for Grade 1 Learners

Capstone Project

Developer | 5-member capstone team (IT411)
Environment: Kotlin, Jetpack Compose, Clean Architecture + MVVM, Room, Hilt, Vosk (offline speech recognition), Python

- Co-developing an offline-first Android phonics app (Marungko approach) that evaluates speech on low-end phones.
- Built child-focused accessibility features (sound captions, mouth-shape cues, 64 dp touch targets, non-punitive feedback) and fixed core game logic in the Blend It word-building activity.
- Wrote the SRS, SDD, and test document; built a Python tool that checks every figure against the JUnit results and APK.

LabaLink — Smart Laundry Booking & Payment Platform (v1.0.0)

github.com/thatguyKire/IT342-Bien-Labalink

Solo Developer | IT342 Application Development Project
Environment: Java, Spring Boot 3.5, PostgreSQL, Kotlin (Android), React 19, TypeScript, Tailwind CSS, Stripe, WebSocket

- Built all three parts alone: a Spring Boot API, a Kotlin Android app for customers (QR-scan to start a machine, Stripe wallet top-up), and a React dashboard for shop attendants.
- Led a v1.0.0 security overhaul: JWT on every endpoint with role and ownership checks, verified Google ID tokens, rate limiting, and account lockout.
- Made payments tamper-proof with Stripe Checkout, signed webhooks, and a block on live Stripe keys.
- Wrote 41 backend tests on embedded PostgreSQL, a Privacy Policy (Data Privacy Act), and the SRS and SDD.

Seoul-Mate Minimart — Live Menu Website for a Korean Store

github.com/thatguyKire/seoul-mate-minimart

Solo Developer | In progress (8 of 11 build steps done), Masbate City
Environment: React 19, TypeScript, Vite, Supabase (PostgreSQL + RLS, Realtime, Edge Functions), Vitest, pgTAP, GitHub Actions

- Building a three-language (English, Filipino, Korean) menu site where stock changes reach open pages within seconds.
- Security first: Row Level Security on every table, optional two-factor staff login, photos checked by content and stripped of metadata, and a rate-limited contact function.
- 132 unit tests, 131 end-to-end tests with accessibility checks on phone and desktop, and 97 database assertions, all run in CI.

SKILLS AND COMPETENCIES

Languages: Java, Kotlin, Python, TypeScript/JavaScript, PHP, SQL, HTML/CSS
Backend: Spring Boot, Spring Security (JWT/OAuth2), Django, Supabase Edge Functions, REST APIs, WebSocket (STOMP)
Frontend & Mobile: React 19, TypeScript, Vite, Tailwind CSS, i18n, Android (Kotlin), Jetpack Compose, Room, Hilt
Data, Cloud & AI: PostgreSQL + RLS, SQLite, Supabase; AWS; Generative AI (Amazon Bedrock), AI/ML Fundamentals
Security & Testing: Auth hardening, rate limiting, Data Privacy Act; JUnit, Vitest, pgTAP
Tools & Modeling: Git, GitHub Actions CI, Android Studio; UML, ERD, SRS/SDD documentation

TRAININGS AND CERTIFICATIONS

- **AWS Academy Graduate — Generative AI Foundations** (12 hours, Oct. 18, 2026) — verify on Credly
- **AWS Academy Graduate — Cloud Foundations** (20 hours, Oct. 15, 2026) — verify on Credly
- **IBM SkillsBuild — AI Fundamentals** (July 19, 2026) — verify on Credly
